

*Swedish Medical Center is located in the south metro Denver area where it has been a proud member of the community for more than 110 years. An acute care hospital with 408 licensed beds, annually Swedish cares for more than 200,000 patients with a team of approximately 2,000 dedicated employees, 300 volunteers and 1,400 physicians.*

*As a national leader in neurosciences, Swedish serves as the hub of the Swedish Neuro Network. The hospital is the Rocky Mountain Region's preeminent referral center for the most advanced stroke treatment and was the state's first Joint Commission certified Comprehensive Stroke Center. Swedish also is home to Colorado's first fully comprehensive robotics program with nine robots in dedicated robotics operating rooms; patients benefit from a high level of specialization with robotics-trained caregivers at every stage of treatment, as well as robotics-specific design in the program's dedicated pre-op, ORs, PACU and inpatient spaces. As the region's neurotrauma and orthopedic trauma provider and a level I trauma facility, more than 150 facilities regularly transfer highly complex cases to Swedish. The trauma program includes a burn and reconstructive center, which has been certified for adult burn care by the American Burn Association and recognized nationally for providing the highest quality of care to both adult and pediatric burn and reconstructive patients.*

*Swedish Medical Center is proud to be a part of the HCA Healthcare's Continental Division, which was named the top health system in the state by IBM Watson Health and our system was named one of the top five large health systems in the country. This division includes our local system, HealthONE, which also received recognition as the top health system in the state by IBM Watson Health. Consistently among the Denver Business Journals' list of top corporate philanthropists in the Denver-metro area, HealthONE contributed more than \$889,000 through cash and in-kind donations last year alone, and also provided \$677M in charity, uninsured and other uncompensated care along with nearly \$200M in federal, state and local taxes.*
